DETAILED ACTION

Allowable Subject Matter

Claims 20-35 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or suggest a method or device having all of the claimed limitations. With respect to claims 20-30, the structure recited in the claims is suggested by the prior art, as discussed more fully in the parent application, 09/663,329. However, the claims are method claims which recite a method of enabling two people who speak different languages to communicate with each other. Campo Agud is directed to a teaching device and method; there is no suggestion in Campo Agud that its device could be used as a means of communication between people who speak different languages. While Renegar contains some disclosure of a communication method using its device, there is no motivation or suggestion to combine these teachings of Renegar with those of Campo Agud to create the claimed method, as the overall structures of Campo Agud and Renegar are substantially different. Also, the device of Renegar is designed to be used for oral communication, while the device of the claimed invention allows for oral and visual communication by way of its display board and cards. Thus, the claimed invention is not obvious in light of the prior art, when viewed as a whole. Claims 31-35 are allowed because of the recitation pertaining to the relative locations of the source phrase, the target phrase and the transliteration of the target phrase. Claim 31 recites that the transliteration of the target phrase is located directly beneath the

source phrase, beside the target phrase. This is useful in a communication aid, because a speaker of the first (source phrase) language can refer easily and directly to the transliteration of the target phrase to communicate a desired phrase to a speaker of a second (target phrase) language. Such a configuration is not suggested by Campo Agud or Renegar, and would not be obvious to include in a device which is used for teaching.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
